

SUNSET large display board

Show what your SUNSET grid-connected system is up to and display the performance data with a SUNSET large display board.

SUNSET large display boards can be connected directly to an impulse metre, with out bothering with otherwise necessary measuring technology. Installation of costly measuring technology is thus not necessary and the display can be operated strait away. Our displays have are extremely cost-effective.

All SUNSET displays have the following features:

- 7 red segment bars (LED), very bright
- 45 or 60 mm digit height
- 5 or 6 digits
- IP 54, wall installation
- Filter screen: red plexiglas
- Casing sheet steel, powder coated
- Dimensions: approx. 446 mm x 224 mm up to 1.200 mm x 450 mm
- printed with titles, categories and units:
 1. row: title
 2. row: current power [W]
 3. row: net yield [kWh]
- Voltage supply: 230 Vac
- triggered by impulse metre

Our displays can also be printed to order e.g. with your company logo.

Large display boards can be made in any size to your specifications. All SUNSET large display boards can easily be integrated into existing data visualization systems.
